Detailed health records for patients across the largest nonprofit network in California

MX Access

Real-time data about your patients' encounters, medications, lab results, providers, insurance, and claims data, all in one place.

- Make informed clinical decisions based on 2–5 years of longitudinal records from across California
- View data via the MX Access portal or directly in EHR and care coordination systems
- Access a wide range of information collected from various sources such as hospitals, clinics, labs, health plans, and other HIEs
- Address gaps in care, lower the risk of adverse events, avoid duplicate tests and procedures, and improve patient care and follow-up

Put comprehensive health data to work at your organization.

Avoid duplicate tests and procedures

Access patients' laboratory results and radiology reports, avoiding the need for expensive and time-consuming repeat tests.

Improve patient flow

Make quicker and better-informed decisions, improving patient flow where services often back up: in emergency departments and at discharge.

Reduce the risk of dangerous drug interactions
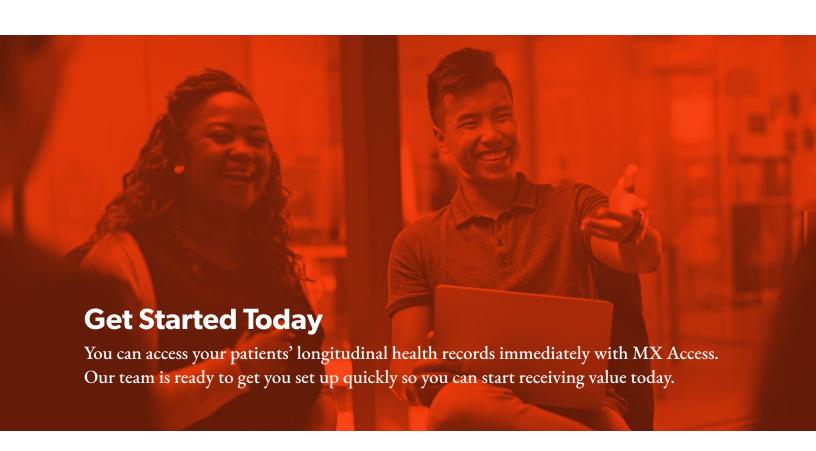

Order medications based on a patient's most updated medication prescriptions and understand what allergies the patient may have.

Know the health of new patients

Rapidly assess the health of new enrollees or attributed patients and reach out promptly to provide the care and help they need.

Get Started Today

You can access your patients' longitudinal health records immediately with MX Access. Our team is ready to get you set up quickly so you can start receiving value today.

Manifest
MEDEX

California's Largest Nonprofit Information Network

Manifest MedEx (MX) facilitates the secure exchange of real-time information on millions of patients across California.
