Release Notes: MX Portal V1.3

The MX portal was upgraded on 12/22/18. Below are the release notes for version V1.3.

TABLE 1: SUMMARY OF CHANGES

Item Number	Summary	Description
1	Patient Search Defect: Patient search DOB	Users can enter a first name, last name, and DOB and then hit "Enter" on the keyboard to display search results
2	Data Defect – Encounters: Admit reason in encounters contains escape characters	Admit reasons no longer contain escape characters in encounters
3	Data Defect – Allergy: An allergy record must have an allergy code or description	When an allergy record does not contain a code or description, the allergy is dropped and not shown in HealthShare
4	Feature Enhancement: Loading data banner	"Awaiting Results" banner disappears and displays a confirmation banner when the record has been updated

The following table presents a comparison between the previous version (V1.2) and the new one (V1.3).

TABLE 2: COMPARISON OF OLD VS NEW VERSION

Item Number	Previous V1.2 (Old)	Upgraded V1.3 (New)
1	**Previously:** When users entered a first name, last name, and DOB and then hit "Enter" on the keyboard, a popup window would appear asking for a valid date	**Updated:** When users enter a first name, last name, and DOB and then hit "Enter" on the keyboard, the search results will be displayed
2	**Previously:** The admit reasons contained escape characters in the Encounters tab	**Updated:** The admit reasons do not contain escape characters in the Encounters tab

3	**Previously:** Allergy record did not always contain an allergy code or description	**Updated:** When an allergy record does not contain a code or description, the allergy is dropped and not shown in HealthShare
4	**Previously:** After users clicked on Refresh in the "Awaiting Results" banner, the banner would disappear	Patient's medical record is now updated **Updated:** When users click Refresh in the "Awaiting Results" banner, a confirmation banner is displayed
